STUDENT ONBOARDING GUIDE

Google Cloud Learn with Communities

Your practical starting guide to Google Cloud hands-on labs, credits, and the campaign syllabus.

Welcome!

Congratulations on joining Google Cloud Learn with Communities. We're excited to support you as you begin your cloud-learning journey. The program offers practical experience with Google Cloud, the platform behind products such as Gemini, Google Search, Gmail, and YouTube.

What you'll need
A Google account, access to the Google Skills platform, your **individual access code**, and the official campaign syllabus.

YOUR FIRST TASK

Activate your credits before starting the campaign labs.

Follow the steps in this guide in order. Use the exact redemption link provided below; searching for the lab separately in the catalog may not open the required redemption flow.

Important
Your access code is unique, can be used only once, and must not be shared or transferred to another person.

Prepared for students participating in Google Cloud Learn with Communities

01 | Activate your credits

Complete the following steps to redeem your access pass and receive the credits described in the program instructions.

1. **Open a private / Incognito browser window**
   Use **Ctrl + Shift + N** on Windows/Linux or **Command + Shift + N** on macOS.

2. **Open the official lab redemption link**
   Go to Google Skills lab redemption page. Enter your individual access code when prompted. Follow the flow shown in the program's walkthrough, if one has been provided.

3. **Sign in to Google Skills**
   After entering the code, sign in to your Google Skills account and continue through the redemption flow.

4. **Check for the initial 9 credits**
   Open the profile icon in the top-right corner and check your credit balance. If the credits do not appear, refresh the page. If they are still missing, sign out and repeat the redemption steps using the specified link.

5. **Start the introductory hands-on lab**
   Open **"A Tour of Google Cloud Hands-on Labs"** and select the green **Start Lab** button.

6. **Complete the lab and end it**
   Follow the lab instructions, spend at least 6 minutes in the lab, and achieve a score of 100. When finished, select **End Lab**. The program instructions state that 200 free credits will then be added to your account.

7. **Verify your credit balance**
   Visit Google Skills — My Account / Credits to check whether the credits have been added.

> **Use only the specified redemption link**
> Searching for the lab directly in the Google Skills catalog may not trigger the required redemption steps. Use the link above and your own access code.

Access code

Enter the unique access code supplied to you by the program or your organiser. Do not publish it in a shared document or forward it to other participants.

02 | If your credits don’t appear

Credit provisioning may take a little time. Try the following before contacting support:

What to do	Details
1. Wait and refresh	After completing the lab, wait a few minutes and refresh the browser.
2. Allow for provisioning	The original program instructions note that credits may take 20–30 minutes to appear.
3. Contact support	If the credits have not appeared after 30 minutes, contact your GDG on Campus organiser or email learnwithcommunities-support@google.com.

03 | Follow the official campaign syllabus

Use the official Google Cloud Learn with Communities student curriculum to identify the required courses, labs, and skill badges.

Mandatory completion rules

- Complete all skill badges listed in the official curriculum.
- Labs or badges outside the official list do not count toward this campaign.
- Extra, unlisted badges may consume your allocated credits. The source guide says additional credits cannot be provided.

04 | Deadline and credit use

Campaign deadline: 23 November. The source instructions do not specify a year, so confirm the applicable deadline with your organiser.

The source guide states that the access pass remains valid until the end of the campaign and that the campaign deadline cannot be extended.

Use your credits only for courses and labs listed in the official curriculum. If your credits run out before you finish the listed work, the program team may not be able to provide more.

Questions about rewards

Contact the organiser who helped you enrol in the campaign. For general onboarding questions, reach out to your GDG on Campus organisers.

Your quick-start checklist

- ■ Redeem your personal access code using the specified link.
- ■ Complete “A Tour of Google Cloud Hands-on Labs” and verify your credits.
- ■ Bookmark the official campaign curriculum.
- ■ Complete every required badge before the confirmed deadline.

Congratulations again on your enrolment. Wishing you a rewarding cloud-learning journey!
